

**COVID-19 Update 28-6-2020**

Beginning July 1, 2020, the Greek government has determined how our country will welcome travellers, carry out the necessary diagnostic screening and keep everyone safe throughout the season.

**COVID-19 Update 27-6-2020****Temperature intake**

According to the National Agency for Public Health, fever is one of the most common symptoms.

To protect the health of visitors, as well as our employees, we will apply remote temperature monitoring.

Visitor's temperature will be measured upon arrival and every morning when they enter the breakfast area.

The staff's temperature will be measured daily before their shift.

**COVID-19 Update 26-6-2020**

The disinfection of the rooms before the arrival of each visitor will be done based on all health protocols.

As an additional method of protection, disinfection of rooms with Ozone O<sub>3</sub> will be applied.

More information on this method can be found in the links below.

[https://adrina.gr/Bio3Gen\\_Brochure.pdf](https://adrina.gr/Bio3Gen_Brochure.pdf)

[https://adrina.gr/Bio3gen\\_rf.pdf](https://adrina.gr/Bio3gen_rf.pdf)

A first application will be done immediately after the visitor leaves and a second one after cleaning and disinfecting the room.

All disinfection, both outdoor and indoor, will be done with certified Ecolab cleaners / disinfectants.

The outdoor areas of the rooms will be disinfected with the use of special Sany Air blowers.  
After the completion of the process each room will be sealed to welcome the next visitor.

We will welcome you in a comfortable and hygienically safe environment.  
Rodopoulos Family

### **COVID-19 Update 16-6-2020**

Since 1992 the Rodopoulos family has always strived to offer quality, carefree and safe holidays to all those who visit the Adrina hotels. Our commitment to the health of our visitors is our priority. That is why we are implementing new ways in the operation of our hotels regarding sanitation and housekeeping and the hygiene of the food departments. We are also taking every measure to implement all rules for social distancing with the main goal of the safety of our guests.

Faced with the new conditions due to Sars-CoV-2, we are moving the opening of our hotels to July 1, 2020, taking into account all health protocols for hotels and applying all new security measures.

#### **The main measures are:**

##### **CHECK IN - OUT**

Check out will take place at 11.00 am, while the check in is transferred to 16.00 pm, so that the rooms can be thoroughly cleaned. In case there is no arrival in the same room on the day of departure, the checkout can take place at 12 p.m. Checking-in can also be completed electronically, from your computer or mobile phone, with the aim of keeping you in the reception area for the shortest time. The possibility of checking in in an outdoor area is being considered.

##### **ROOMS**

All non-essential items such as magazines, leaflets, laundry bags, bathrobes, decorative pillows, blankets will be removed from the rooms.

Air conditioners in all rooms are autonomous units and are not part of the central air conditioning. All units have been maintained, disinfected and will be disinfected after each departure.

It is recommended by health protocols that housekeeping doesn't clean the room every day during ones stay to limit any personnel contact with visitors. It is also recommended to change sheets and towels only at the request of the visitor as opposed to daily.

## **DISINFECTION TEAM**

A disinfection team is set up to sanitize the rooms after each departure. The rooms are meticulously cleaned so that every visitor can find a safe, clean environment. As an extra precaution of reliability, the team seals the room after cleaning, placing a special tape on the door of the room that will indicate to visitors that no one had access to their room after the disinfection was completed.

## **COVID-19 AREA**

At the Adrina Beach Hotel, a separate, isolated space is created in case of a COVID-19 patient in case the person with symptoms cannot be transferred to the Skopelos Health Center. We are waiting for information from the authorities for the reference hotels of our island.

## **FOOD SERVICES**

### **Breakfast Restaurants**

The buffets in the breakfast rooms will not be open and all breakfast orders will be served at the tables. Disinfection of the hands is mandatory upon entry. If necessary, the opening hours will be extended. Security measures will be increased, and must be observed by both employees and guests. There is a possibility that for the month of July and September there will be a common breakfast area for the guests of both our hotels.

### **Restaurants**

For the summer of 2020, two of the a la carte restaurants are open throughout the day, namely the Adrina Beach Restaurant and the Adrina Resort & Spa Lunch Restaurant.

The Adrina Beach Restaurant serves as a central dinner restaurant for both hotels. For this reason, an extension of the terrace of the restaurant of the Adrina Beach was constructed in order to observe the prescribed distances.

An 100 meter path easily connects the Adrina Resort & Spa with the Adrina Beach's main restaurant. Club cars are available to transport guests from both hotels to and from the restaurant throughout the day.

The evening restaurant of the Adrina Resort & Spa will not be open. Instead, the lunch restaurant of the Adrina Resort & Spa remains open, which will offer limited options of salads and main course dishes for adults and children.

Finally, the Pool Bar of the Adrina Resort & Spa will remain closed and guests will be served by the restaurant just a few meters away from the pool area.

## **BEACH**

On the beach the placement of umbrellas and sunbeds will strictly follow all health protocols and distances. Each deckchair will be disinfected after the visitor leaves. Visitors will be asked to remove all their personal items as they leave the beach.

### **LIFT- ELEVATOR**

Disinfectants are available at every stop on the cable car and in the cabin so that guests can disinfect their hands after using the elevator knobs. It is recommended to use the elevator by one family at a time. The air conditioning and ventilation of the chamber have been modified so that only fresh air enters the chamber during operation and the recirculation of the air of the chamber is prevented.

### **GYM**

We have installed a new ground floor gym near the beach stop of the Adrina Resort & Spa elevator. Use of the gym will only be allowed by two people at a time or more if it is a family. There is a possibility the gym will be closed during the day for disinfection and ventilation.

### **SWIMMING POOLS**

The main swimming pools of both hotels operate with seawater that is recycled non-stop 24 hours a day, 7 days a week. Every 7 days the main pools will be drained and cleaned with high pressure water machines.

The procedures required for the private pools of the Adrina Resort & Spa hotel's villas will fully comply with instructions given by the health authorities.

We would like to point out that for the summer of 2020, the Spa and Kid's Club services will not be offered for your safety. There will not be any kids club services. The area will be open as a playground and all children must be supervised by their parents at all times.

Thank you for your preference and trust in us all these years.  
The Rodopoulos family
